

VL OMNI'S SAP ECC CONNECTOR

Transforming Data, Connecting Business

Accelerate Growth with VL OMNI: Your trusted GDPR-compliant integration platform partner for real-time, agile and scalable iPaaS data integration. Trusted by over 200+ growing merchants and a network of trusted partners.

The Platform

VL OMNI's integrations work by connecting unique applications together by normalizing the data between the applications, and applying business rules directly to the data as it moves.

Built on cutting-edge AWS microservices technology, growing brands looking for an agile and scalable data integration solution come to VL OMNI for our expertise with B2B and B2C ecommerce and EDI. VL OMNI allows merchants to move their data in ways that matter most to them.

VL OMNI- SAP ECC Connector

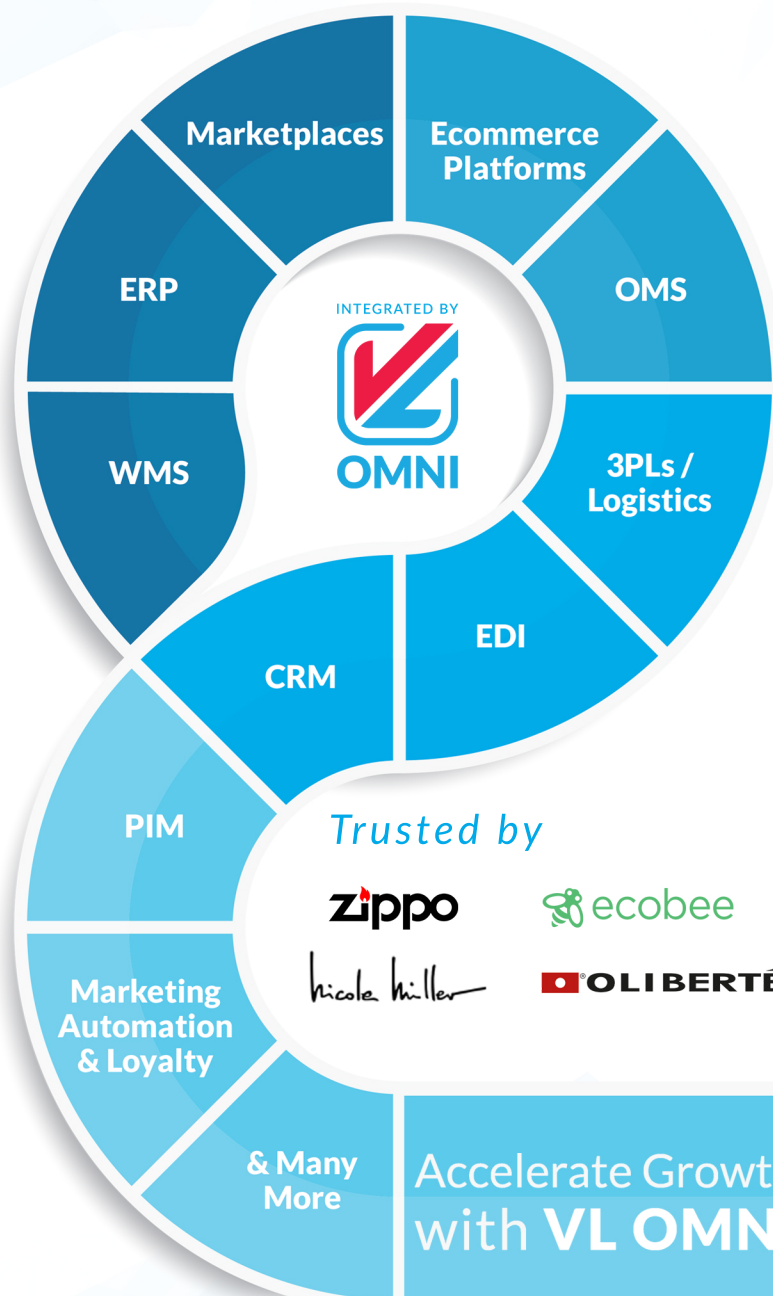

Integrate SAP ECC to more applications with this fully elastic and scalable Connector. Merchants can move data in real-time from a single point to one or many, apply business rules directly to data as it moves, and more all in the cloud built on cutting-edge iPaaS technology.

Key features:

- ▶ Serverless
