

The Shopify Global ERP Functionality Comparison Chart

Questions	Shopify Global ERP Program Plug-And-Play Solution	ERP Integration Powered By VL OMNI's Managed Service
Products: Do I have to adhere to a specific product template setup in my ERP?		No. We can use whatever is setup in the ERP
Products: Can I handle a complex variant structure or parent child scenarios?		Yes
Products: Am I limited by the product detail I can feed to the Shopify store?		No. We can use whatever is in the ERP and we can pass through the Shopify APIs
Images: Can the ERP Integration include images in the integration or do I have to load images manually?		Yes. We have a strategy to merge product detail with images from a publicly facing external source.
Inventory: Can I have multiple inventory locations in the integration?		Yes. Shopify Plus has the ability to handle multiple locations. So do we.
Inventory: Can I pass In Transit inventory to take pre orders		Yes. As long as the ASN data is available. This does require theme modification
Pricing : Can I pass timed promotions and discounts from my ERP		Yes. As long as they are set up in the ERP
Fulfillment: Can I do payment capture on fulfillment?		Yes as long as you don't do split shipments
Fulfillment: Can I do split shipments ie: post multiple shipments against the same order?		Yes. We need line item detail from the ERP to be able to handle multiple shipments per order.
